

PRESS RELEASE  
For Immediate Release

## RAMI to offer Lifetime Warranty on General Aviation Antenna Line

February 9, 2011—GRAND HAVEN, MICHIGAN

---

RAMI is announcing a Limited Lifetime Warranty on its entire line of general aviation antennas. All products included in this line are to be free of defects in both materials and workmanship under normal use and service for the lifetime of the product. RAMI has stood behind the quality of its products for years by offering superior customer service as well as a three-year warranty however, expanding the warranty to cover the lifetime of aviation products solidifies a dedication to performance and longevity.

Offering a Limited Lifetime Warranty is significant because it is the first of its kind to be announced in the general aviation antenna market. In an economy that sees competitors cutting cost and jeopardizing long term quality, RAMI is seizing an opportunity to guarantee materials and workmanship. RAMI will continue to maintain the low costs and performance that have made their antennas the obvious choice for a growing number of OEM's and distributors of aviation products.

Should a defect in the antenna's materials or workmanship occur, the owner will first need to contact RAMI in order to receive a "Return Material Authorization" RMA number. Once the product acquisition details and the nature of the defect or malfunction has been established, the product will be returned to RAMI in Grand Haven, Michigan. If determined upon examination by RAMI that the product meets the Limited Lifetime Warranty criteria, the product will be replaced and returned to the owner free of charge. If you have any questions or would like a copy of RAMI's Limited Lifetime Warranty on aviation products, please feel free to contact the company.

---

RAMI was founded in 1954 and shortly after in 1956, RAMI began manufacturing antennas for the government. In 1992, RAMI (R.A. Miller Industries, at the time) purchased the general aviation antenna line from Antenna Specialists and has continued to improve and expand this line ever since. RAMI is ISO 9001 and 14001 certified and the general aviation line of products are FAA TSO approved. With state-of-the-art test facilities and the ability to design, engineer, and manufacture products from the ground up, RAMI continues to be an industry leader on the cutting edge of technology.
