AV-7F VHF Wideband Mobile Antenna

W/ Fixed NMO Mount

Frequency Range: 118-137 MHz

The antenna is supplied ready for use at the aircraft COM band frequencies of 118-137 MHz.

Installation Location

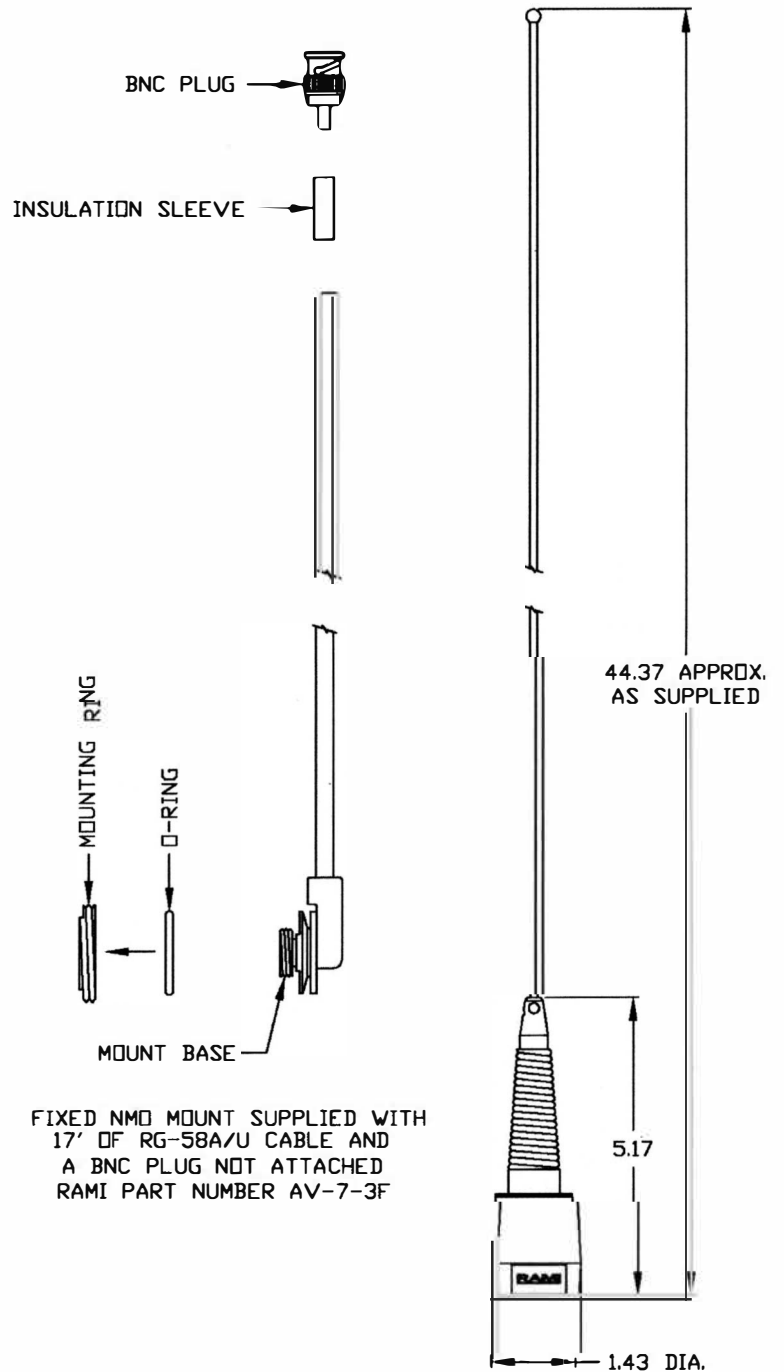

For maximum performance, the antenna should be mounted in the center of the vehicle roof.
 For satisfactory performance, the antenna can be mounted on the vehicle fender or trunk deck.

Mounting

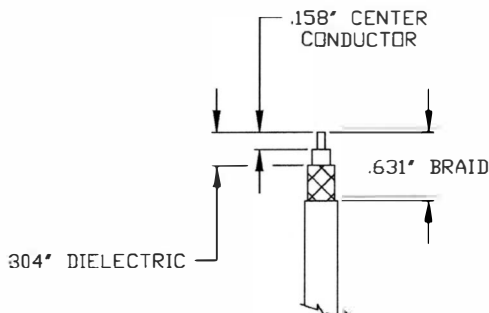

Drill a 7/8" diameter hole in desired location. Insert mount base thru hole. Place o-ring into threaded mount ring and thread onto mount base. Tighten mount ring using flats until secure.

Attach Connector

Cut cable to desired length and attach BNC connector with insulation sleeve.

FIXED NMO MOUNT SUPPLIED WITH 17' OF RG-58A/U CABLE AND A BNC PLUG NOT ATTACHED
