**AV-265 Antenna**  
(Incomplete System)

Frequency  
700-6000 Mhz

**Installation Instructions**

- 1.) When possible, mounting locations should be at least 18" from any other metal protrusions and on as flat a surface as possible on the aircraft belly.
- 2.) Using the template provided, drill four mounting holes and one hole for the connector.
- 3.) Mount the antenna by placing the O-Ring provided into the groove in the antenna base. Insert mounting screws provided as shown below and tighten all mounting screws securely to provide good electrical contact.
- 4.) Connect the antenna to the aircraft radio using an RG-400 or similar 50 ohm coax cable with a TNC type male connector attached to the antenna end of the cable (not supplied). Terminate the other end of the cable with a suitable connector to mate with the aircraft radio.
